PID: C0070005
TaskID: 4708
Mine Name: SKYLINE MINE
Title: RAIL LOADOUT ROAD REHAB & ASPHALT

Operation Plan

Road System Plans and Drawings

Analysis:

An amendment was submitted by the Permittee to improve the rail loadout area due to a planned increase in truck traffic. The area, approximately 1675 linear feet, will be paved between 3" to 5" of asphalt to reduce the sediment track-out from the site and improve sediment control. A section of previously used section of road will also be rehabilitated to connect the western section of the facility. Plates 3.2.1-3_REV29, Plate3.2.1-3a through 3d were edited or added to the MRP. The bond was also appropriately adjusted.
