Hello Gregg,

Upon approval of the NOG Bleeder Shaft, the disturbed area for the Skyline Mine will increase 3 acres, from 122.31 to 125.31 acres and the Reclamation Agreement will be required to be revised to include a new Exhibit A.

Although this task has not yet been approved, I have attached the documents to give you a head start.

Exhibit D "Stipulation to Revise the Reclamation Agreement"- revises the disturbed acreage from 122.31 to 125.31 acres and indicates a replacement of Exhibit A in it's entirety. This document is to be signed by the Permittee, an affidavit is attached.

Exhibit A "Bonded Area/Legal Description" The legal description should be revised to include the additional 3 acres of disturbed area. The legal description is the disturbed area/bonded area within the permit area. It should describe the 125.31 acres, not the total permit area. This document is to be signed by the Surety Company, an affidavit is attached.

The New Exhibit A (bonded area/legal description) should alleviate any previous legal description errors.

Thanks Gregg, if you have any questions, please give me a call.
