All:

We identified an error in our previous submission. JC-1 was not running for 10 days from April 28 – May 8. Proper communication was not restored with JC-1's data collector until early June. Our pump monitor showed zero flow for May, so May's submission showed no pumping during May. Now that we have proper communication with the well, we've been able to download the actual pumping rates. I've corrected the data. Corrected spreadsheet attached.
