1. Permits, Change, Transfer, Renewal, Sale

There are no permitting actions with the Division at this time.

2. Signs and Markers

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo

3. Topsoil

The topsoil piles were partly snow covered. It is unlikely that wind or water erosion has occurred since the piles are well vegetated.

4.a Hydrologic Balance: Diversions

I inspected the diversions and culverts throughout the property. Some snow was within the diversions and culverts, but, these structures were functioning as designed. Some diversions had water flowing within them.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected the sediment ponds throughout the property. They contained some water but were not discharging. It is unlikely these structures will discharge in the near future. The embankments appear to be stable. Inlets and outlets would function as designed. I did not see any hazardous conditions to these structures.

4.c Hydrologic Balance: Other Sediment Control Measures

Silt fences were inspected and comply with the requirement of the R645 Coal Rules.

8. Noncoal Waste

The property was clear of non-coal waste materials such as oil, trash and grease cans.

10. Slides and Other Damage

No slides or other damage was notice during the inspection. The mine site appears to be stable.

16.a Roads: Construction, Maintenance, Surfacing

The roads were compacted with no dust control problem. They were wet and muddy from the melting snow.

16.b Roads: Drainage Controls

I inspected the road diversions and culverts throughout the property. They were functioning as designed. Some of the diversions have some sediment build-up within. Diversions will need cleaning out in the near future. See Photos
