**1. Permits, Change, Transfer, Renewal, Sale**

There are no permitting actions with the Division at this time.

**2. Signs and Markers**

The permittee is in the process of changing out the identification signs updating with new information. Enclosed is picture of old identifications.

**3. Topsoil**

The topsoil piles were snow covered. It is unlikely that wind or water erosion has occurred since the piles are well vegetated.

**4.a Hydrologic Balance: Diversions**

Diversions and culverts were completely snow covered. Due to low temperatures it is unlikely that the diversions had water flow.

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

The sediment ponds are snow covered. No sediment pond was discharging during the inspection. It is likely that these sediment ponds will discharge in the near future. Embankments, inlets and outlets are snow covered.

**8. Noncoal Waste**

I did not notice any non-coal waste materials. The mine site is completely snow covered.

**10. Slides and Other Damage**

No slides or other damage was noticed during the inspection. The mine site and loadout appear to be stable.

**16.a Roads: Construction, Maintenance, Surfacing**

The roads were compacted with no dust control problem. The roads were snow covered.
