**1. Permits, Change, Transfer, Renewal, Sale**

There are no permitting actions with the Division at this time.

**2. Signs and Markers**

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo

**3. Topsoil**

The topsoil piles were snow covered. It is unlikely that wind or water erosion has occurred since the piles are well vegetated. See Photos

**4.a Hydrologic Balance: Diversions**

I inspected the diversions and culverts throughout the property. Diversions were snow covered and culverts were open. These structures would function as design. It is highly likely with the amount of snow this winter. The permittee will need to re-grade the diversions.

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

I inspected the rail loadout and mine sediment ponds. These ponds contain water but were not discharging. It is likely these structures will discharge in the near future. No hazardous conditions were notice. The embankments were snow covered. Water was entering into the ponds.

**8. Noncoal Waste**

Once the snow has melted; it is likely non-coal waste material will need to be pick-up.

**10. Slides and Other Damage**

No slides or other damage was notice during the inspection.

**16.a Roads: Construction, Maintenance, Surfacing**

Roads were muddy.

**16.b Roads: Drainage Controls**

Diversions for the most part were snow covered. Water was running in the diversions.

**18. Support Facilities, Utility Installations**

No new facilities constructed since the last inspection.
