Hey Todd,

Sorry, I thought that I had already replied back to you. I do not have any additional wildlife issues. My biggest issue was having power poles that are relatively raptor safe and I was told that would be the case. The change in location does not impose any problems. I am on board with the project. If you have any additional questions, please call me on my cell.

Thanks,

Jeff

Hey Jeff,

I hope everything is going well for you. As I'm sure you know, the Skyline mine is wanting to change up their powerline configuration a little bit so I wanted to check with you to see if you had any wildlife issues that I should be aware of. I've attached their proposal for you to look over. I believe they are seeking a Special Use Permit from you guys since part of the corridor falls "off-lease" so I'm sure you've already seen this. I know they do regular raptor surveys and I'm not aware of any raptor issues in this area. I believe there is also some crucial elk calving and deer fawning habitat but I'm not sure how up-to-date that information is. I'll also be in touch with DWR to see what they have to say. Let me know if you have any concerns or questions.

Thanks!
