Price, UT 84501

Re: ACT/007/006

Dear Mr. Rigby:

We have reviewed the final design plan for the Lion Portal Deck extension and find the technical details to be sufficient. We therefore approve the design of the structure and approve the construction thereof conditionally upon your immediate resubmission of the design documentation certified by a registered professional engineer. Under 715.15 (a) (3) of the OSM interim regulations the design of this structure must be certified by a P.E. but that the inspection reports of construction can be certified by a qualified professional.

Sincerely,

BRIAN W. BUCK  
ENGINEERING GEOLOGIST
