August 2, 1979

Mr. Ron Daniels  
Dept. of Natural Resources  
Division of Oil, Gas & Mining  
1588 West North Temple  
Salt Lake City UT 84116

Dear Mr. Daniels:

Enclosed please find three copies of the information requested in your Interim Order Cause No. ACT/007/006 dated June 27, 1979. The information submitted as required by the interim order should be sufficient to abate the violations of Rule MC 717.15 listed as numbers 7 and 8 in your letter of January 31, 1979.

These enclosures include:

- a) A revised certification stating, in addition to that which is already certified, that the pile is constructed in accordance with MC 717.15 (715.15(b)) and will continue to be constructed in like manner.
- b) A copy of the correspondence with M.S.H.A. relative to the culvert sizing, the watershed area, and the amount of runoff passing through the culvert. In addition, copies of the calculations used in determining the culvert design are enclosed.
- c) The final abandonment plan to permanently divert the drainage that flows under the refuse pile. It should be noted, however, that this plan would only become effective if the road passing over the culvert is not deemed necessary for access to the Gentry Mountain. If the road is to be left open at cessation of the mining operation, then the responsible government agency will perform the necessary maintenance on the structure.

Mr. Ron Daniels  
August 2, 1979  
Page Two

- d) A copy of the Mine Safety and Health Administration approval for the upper refuse pile. (To be forwarded under separate cover.)
- e) A drawing that shows the final configuration, including elevations, of the waste disposal facility. This is shown on the plan for abandonment.

Please contact me should you have any questions regarding this information.

Sincerely,

UNC PLATEAU MINING
