RE: Energy Fuels Nuclear
PMC - Starpoint

Dear Cy:

In answer to the questions which you raised concerning revegetation test plot requirements for Plateau Mining Company and Energy Fuels Nuclear, I have obtained the following information.

Plateau Mining Company was directed by an Interim Board Order:

1. To perform continuing tests in revegetating the upper waste pile cover material, and
2. To undertake continuing test plantings to determine the best methods to be applied in utilizing the overburden from the Lion Portal Deck as a plant support medium on the steep slopes below the deck and new road.

Energy Fuels Nuclear has committed to the establishment of revegetation test plots to determine the need for soil amendments, revegetation techniques and the exact species to be used in final reclamation of disturbed areas. The disturbed areas would specifically include the developmental waste rock dumps.

I hope this information is useful to you.

Sincerely,

MARY ANN WRIGHT
RECLAMATION BIOLOGIST
