DIVISION OF
 OIL, GAS & MINING

RE: U-37045 Development

Dear Mr. Smith:

As per our conversation today, I am enclosing a copy of the request for the approval of mining in the above captioned lease that was submitted to O.S.M. Denver.

We are also requesting that the Division take the appropriate action in approving this proposal. As your review is necessary before the final approval of this plan can be made, it is important that your immediate attention be given to this matter. O.S.M. is awaiting your comments and your response should be directed to Mr. John Nadoski in the Denver O.S.M. office.

We would appreciate hearing from you as soon as possible should you have any questions for us.

Sincerely,

PLATEAU MINING COMPANY

S. W. Rigby

RE: U-37045 Development

Dear Mr. Hotchkiss:

Enclosed please find a letter and associated map requesting approval of the mining method and extent of mining in Federal Lease U-37045.

We would appreciate your immediate review of the plan. If you have any questions please direct them to me.

O.S.M., Denver (John Nadolski) is awaiting your response to this plan. As your concurrence is required before final approval can be given, your immediate attention would be appreciated.

Sincerely,

PLATEAU MINING COMPANY

RE: Federal Lease U-37045 Development

Dear Mr. Crane:

Enclosed please find three (3) copies of the development schedule for Federal Lease U-37045. The schedule details the tonnage projections and geographical projections for mining 250,000 tons of coal out of this area in the next year.

This plan is being sent to your office for approval as a minor modification as discussed in our October 2, 1980 on-site meeting.

As we are fast approaching the temporary limit line established in your March 12, 1980 letter, we would appreciate a speedy response to this action. Questions, concerns, or clarifications can be directed to me.

Thanks again for your concern in this matter.

Sincerely,

PLATEAU MINING COMPANY

S.W. Rigby

DEVELOPMENT OF FEDERAL LEASE U-37045

(1Year; 250,000 Ton Production Limit)

I. DEVELOP NORTHWEST PANEL

- A. Mining will initially be concentrated in areas ①, ②, and ③ as indicated on the attached map.
- B. It is anticipated that burn will preclude extended development in these areas.
- C. When burn or the outcrop barrier is reached in directions ① and ③, retreat mining will commence. Pillars will be extracted to the "Pillar Retreat" line as indicated on the map.
- D. Using the projected burn as the limit on mining, there are 38,000 tons of recoverable coal in this area.
- E. Additional tonnage will be obtained if mining can advance beyond the projected burn line.

II. DEVELOP NORTH - NORTHEAST PANEL

- A. When pillar extraction is complete in the Northwest panel, advance mining will begin in the Northeast direction in the area designated ④ on the map.
- B. The direction of mining will change and head to the Northwest after approximately 1,600 feet of mining. This is area ⑤ on the map.
- C. The panel will again turn to the North (area ⑥) if burn is not encountered first. Once burn or the property line is reached, retreat mining would commence.
- D. The tonnage calculation for this area is based on the assumption that burn will be encountered before area ⑥ can be developed. In that case, the remainder of the 250,000 ton limit (212,000 tons) would allow Plateau Mining Company to mine to the projected burn line (177,000 tons) and begin retreat mining in area ⑧. The cut-off line is shown on the map.
- E. If Plateau can mine in areas ⑥ and ⑦, which is desirable, the mining limit line would then be placed farther to

the North.

III. NOTES

- A. Plateau will continue with its present rate of production in this lease.
- B. The shaded area on the map indicates 250,000 tons of production.
- C. It is understood that should these areas not yield the anticipated amount of coal, arrangements would be made, with the appropriate agencies, to designate other areas of mining to compensate for shortages.
- D. This lease is to be included in the forthcoming Mine Plan. Upon approval of the Mine Plan, the special stipulations concerning this lease will be terminated.
- E. The Office of Surface Mining will be the approving agency on this development plan.
- F. Plateau Mining Company will inform the appropriate agencies should any unusual circumstances or conditions arise pertaining to this lease.
