Memo to Coal File:

RE: Conveyor-OSM Trip
Skyline--ACT/007/005
Sage Point-Dugout--ACT/007/009
Starpoint--ACT/007/006 ✓
Deer Creek--ACT/015/018A

The above-noted proposed and active minesites were visited by Mary Ann Wright of the Division and Don Henne, OSM, on November 13 and 14, 1980, for the purpose of viewing proposed conveyor routes or existing conveyors. Concerns for big game movements or migration routes, as specified in UMC 817.97, has caused the need to learn more about conveyors and conveyor route planning.

The trip began with a briefing and tour of the Antelope Island (S. J. Groves) conveyor conducted by Mr. Bill Peterson, PEMCO, the designer of the conveyor.

MARY ANN WRIGHT *MAW*
