RE: Revegetation Test Plots

Dear Mr. Grimes:

This is to confirm our phone conversation of September 29, 1980. During the conversation, it was noted that a Mr. Dennis Hansen, representative of Native Plants Incorporated, had been contacted by Plateau Mining Company, for recommendations on establishing revegetation test plots for the Plateau Mining Company's Starpoint #1 and 2 mine complex. Mr. Hansen has made his recommendations concerning installation of the test plots. Plateau Mining Company is prepared, at this time, to begin the implementation of the test plots on October 6, 1980.

It is felt that Division members, i.e., Mary Ann Wright, reclamation biologist, should have the opportunity to review the recommendations prepared by Mr. Hansen. A copy of the plans will be sent to the Division of Oil, Gas & Mining as soon as possible, in addition to a preliminary review of the minesite with Mr. Helfrich on the 2nd of October 1980. The Division members would like to take the opportunity to review the proposed plans for the installation of the revegetation test plots, However, actual implementation of the test plots is of primary concern at this point in time.

If you have any questions regarding our phone conversation or the contents of the letter contained herein, please give me a call.

Sincerely,

JOSEPH C. HELFRICH
RECLAMATION SOILS SPECIALIST
