Re: Corner Canyon Breakout

Dear Mr. Lauman:

The minor modifications you explained to us on November 1, 1982, which are included in your letter dated October 29, 1982, are approved for the underground mine works. You will need approval of the State and the surface managing agency for the actual breakout into Corner Canyon.

We have determined that this minor modification of the underground plan will not effect the physical environment to require an environmental review.

An approved copy of your letter and the attached partial mine print are enclosed for your files.

This plan will provide facilities for long term mine development and will provide maximum recovery of the resource under existing approved stipulations.

Sincerely yours,

Jackson W. Moffitt  
District Mining Supervisor
