RE: UT 0018

Dear Wayne:

We have reviewed the February, 1982 report prepared by R & M Consultants, Inc. concerning sedimentation ponds No. 1, 3, and 5 for the Star Point Mine. This analysis continues to identify stability problems with those ponds and does not identify a satisfactory solution to this problem.

As previously arranged, Bob Bamburg and Ken Lawver from my office will meet with you and company representatives at the mine site on April 30, 1982 to look at the ponds and discuss this problem.

Sincerely,

Richard E. Dawes  
Deputy Administrator  
Western Technical Center
