4241 State Office Building  
Salt Lake City, Utah 84114

Dear Wayne:

During our last Quarterly Inspection it was brought to my attention that your office was to be notified to all changes or modification of any of our approved permits or plans. It is still somewhat unclear as to what constitutes a change of any significance but I am confident this can be worked out over the next few inspections.

In light of the above I will briefly update you on the status of our operation which may be considered a change, not in content of form, but rather timing.

Item #1 - Reply to stipulation 2-2-22 Refuse Pile mitigation. An extension has been requested based on a reply from Getty on the Unit Train Load Out.

Item #2 - Request of Lynn Kunzler to approve some test sites on re-vegetation work (carry over from fall of 1981).

Item #3 - Due to fluxuation in coal markets the coal storage on refuse pile has not yet been abandoned and will continue to be utilized.

Item #4 - Sediment Pond #4 appears to be reaching the 60% capacity and will be cleaned as weather permits.

Item #5 - Oil storage adjacent to drop drain #4 has been abandoned and the drain will be reopened.

**RECEIVED**

MAR 11 1982

**DIVISION OF  
OIL, GAS & MINING**

All items in Sandy Pruitt's inspection report of February 26, 1982 are addressed presently or will be as soon as weather conditions allow.

Thank you very much.

Sincerely,

PLATEAU MINING COMPANY
