Ben Grimes
Plateau Mining Company
P.O. Drawer PMC
Price, Utah 84501

Dear Mr. Grimes:

The topsoil storage reference area will have two different sites and productions. The southwest facing slopes will be the Upland Shallow Clay D-34 range site with some P.J. The production is between 200 and 500 pounds per acre depending on condition and precipitation that year. This site is producing about 300 pounds per acre. The conditions of this site is fair.

The east slope is an Upland Stony Loam (Pinyon Juniper) D-34 range site. The production ranges from 550 to 1,500 pounds per acre depending on conditions and yearly precipitation. The production on this site is about 800 pounds per acre. The condition of the site is fair.

George S. Cook
Range Conservationist
