RE: TRASH BIN AREA

Dear Dave,

The trash bin area has been a controversial area for some time. We would like to resolve the issue and put it to rest.

In September, 1981, we submitted a plan to construct a concrete bin and install a culvert. The culvert was not installed because the ground in the area is almost solid rock.

Since, we have received another violation (NOV 83-6-4-2) on the area. As abatement of this NOV, we submitted a new plan to construct a new concrete bin for scrap metal on May 4, 1983.

We would at this time, propose two things: (1) Instead of installing a culvert, we would like to fill and grade the area, as shown on the attached Exhibit I (General Location), to slope to the existing drain; (2) The physical shape of the proposed concrete bin has been revised as shown on Exhibit I, attached.

Since changing the shape of the concrete bin is a minor change, we will proceed to construct it according to our schedule.

We will await the Division's approval on regrading of the area.

Sincerely,

PLATEAU MINING COMPANY
