Dear Mr. Smith:

We received a copy of your letter to Plateau Mining Company, dated April 4, 1983, granting approval for Plateau Mining Company to proceed with the Corner Canyon Breakout (Entry #4). Apparently, this approval was based on verbal comments from Forest Service personnel.

This letter is to confirm that the Manti-LaSal National Forest has no objection to the breakout, as long as no activity will occur on the outside of the breakout, and material is pulled back into the mine, rather than allowed to spill down the slope.

We are in the process of reviewing the Corner Canyon Ventilation Facility Supplement and will submit our comments as requested in your letter dated April 4, 1983.

PMC should be notified that any additional work on the facility requires formal notification of approval of their plans.

Sincerely,

for
REED C. CHRISTENSEN
Forest Supervisor
