RE: UNIT TRAIN/WASH PLANT EXPANSION PROJECT PERMIT OVERVIEW

Dear Mr. Feight:

Enclosed are seven copies of Plateau Mining Company's Unit Train/Wash Plant Expansion Project Permit Overview.

As requested by Jim Smith of DOGM, we are submitting this overview of the proposed expansion to give you and your staff an opportunity to acquaint yourselves with the nature and scope of the project. The formal permit application will be submitted on or about March 20, 1983.

Only very brief discussions of environmental data, environmental consequences, schedules, reclamation and bonding are included in this overview. Detailed coverage of these items and all other regulatory requirements will be included in the formal permit application.

We believe the addition of the unit train facilities and wash plant expansion constitute a minor revision to our present mining permit. The new facilities are not a significant departure from the method of conduct of mining or reclamation as defined by UMC 788.12. Sixty percent of the new disturbance will be on areas already disturbed by present operations. The newly disturbed area will be only about six acres.

After you and your staff have had a chance to review the overview, we would like to schedule a site visit to familiarize you with the site.
