Inspection Memo
to Coal File:

RE: Plateau Mining Company
Starpoint #1 & #2
ACT/007/006
Folder No. 7
Carbon County, Utah

A partial inspection was conducted on April 11, 1983 by Barton Kale of the Division. The purpose of the visit was to check on abatement work done to terminate violation N83-6-4-2.

Violation #2 of 2 was terminated based on work done within a day of when the violation was issued. A berm was created along the length of the railroad bed, separating the disturbed runoff from the undisturbed drainage. This channels water to the Prep Plant pad where it eventually enters a sediment pond.

Violation #1 of 2 could not be terminated yet due to the placement of trash trailers still on-site. Plateau is in the process of determining the proper placement of this equipment. They are still well within their abatement time frame.
