RE: Final Approval  
Corner Canyon Ventilation Facility  
Star Point Mines  
ACT/007/006, Folder No. 4  
Carbon County, Utah

Dear Mr. Tucker:

The Division has completed the review of Plateau Mining Company's June 10, 1983 supplemental response to our May 20, 1983 letter. All of the Division's concerns have been adequately addressed and the proposal is now in compliance with the performance standards of the permanent coal regulatory program.

The Division hereby issues final approval to proceed with the implementation of the proposal in accordance with the approved plan and the following conditions:

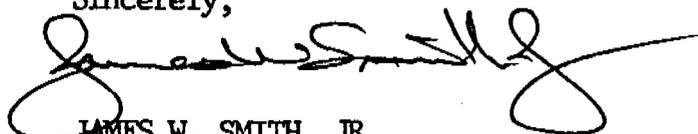

1. A letter from the U. S. Forest Service (USFS) concurring with the Division's approval for the ventilation proposal must be received by this office prior to this approval becoming effective.
2. The Division also recommends that a trash rack be implemented at the inlet to the 18 inch culvert to preclude debris from plugging the pipe internally.
3. UMC 817.11 - The operator should add the statement "Do Not Disturb" to stream buffer zone signs and topsoil signs.

Mr. Floyd J. Tucker  
ACT/007/006  
June 15, 1983  
Page 2

4. UMC 817.24 - The operator must provide a map showing the actual topsoil depths and locations associated with the Corner Canyon Breakout as committed to on page 3 of the June 10, 1983 response. This map should be submitted within 60 days of receipt of this approval, or sooner if available.

Should you have any comments or questions, please contact myself or D. Wayne Hedberg of my staff.

Sincerely,

JAMES W. SMITH, JR.
