

October 19, 1984

TO: Coal File, Inspection and Enforcement Folder
FROM: David Lof, Mining Field Specialist 
RE: Plateau Mining Company, Starpoint Mines, ACT/007/006, Folder #7, Carbon County, Utah

On September 21, 1984 a partial inspection was conducted at the above mine site.

At the time of the inspection the operator had a contractor on site who was drilling and pressure grouting the areas along the access road to the Lion Deck where settling has been occurring. Once the pressure grouting has been completed the operator plans to regrade the road surface and resurface those areas with asphalt. Monuments will be installed in these areas so that they can be surveyed and monitored for any further settling.

The operator had a dragline onsite and was in the process of excavating Sediment Pond #5.

A modification to Cessation Order C84-4-3-1 was hand delivered to Mr. Mike Dmitrich of Plateau. The modification changed the affirmative obligations and time for abatement section of the violation to read as follows:

- A. Cease operations immediately.
- B. Submit complete plans to the Division for the reclamation of the road by October 2, 1984.
