GAS & MINING

RE: REFUSE PILE TEST PLOTS -  
CONSTRUCTION OF UNIT TRAIN FACILITIES

Dear Mr. Braxton:

We would like to thank you for the opportunity to meet with you and your staff last week, and for the Division's clearance to start construction on the refuse pile test plots.

As we mutually agreed in the meeting, we will do the following:

- (1) Prepare comparison data for the fertilizer treatments on all soil depth plots and submit the results along with means, standard deviations, and "t" values.
- (2) Sample the refuse study plots for years 1, 2, 3, 4, 5, 7, and 10. This schedule may be amended upon mutual agreement of the Division and Plateau.
- (3) Analyze all test plots and studies to determine if Stipulation 6 has been, or can be, fully addressed.

As per our agreement, the information listed above will be submitted to the Division by May 22, 1985.

Lynn Kunzler phoned on Friday, April 19 and said that the Division had evaluated the fertilizer analysis of Plots C1 and C2, and that the Division's opinion is that the plots lost in construction, B2 and C1, would not need to be reestablished. We thank you for this determination as it agrees with our position on the matter.

Respectfully,

PLATEAU MINING COMPANY
