Re: NPDES Discharge Point 001 - Permit UT0023736  
Add New Discharge Point 009 - Permit UT0023736

Dear Sir:

Water discharged from Point 001 continues to exceed our current limit for total dissolved solids (TDS). We have corresponded with your office previously regarding this situation. Letters to your office dated 4/11/85 and 6/28/85 outlined the reasons for the exceedances and requested increase in the limit. We, as yet, have received no notification on our request. Please review this situation and inform us what action to pursue.

We have recently completed construction on another sedimentation pond which needs to be added as a discharge point. The attached map shows the new pond as Number 009, which was previously shown as a future discharge point.

Please advise us as to any further action required on Discharge Point 001.

Respectfully,

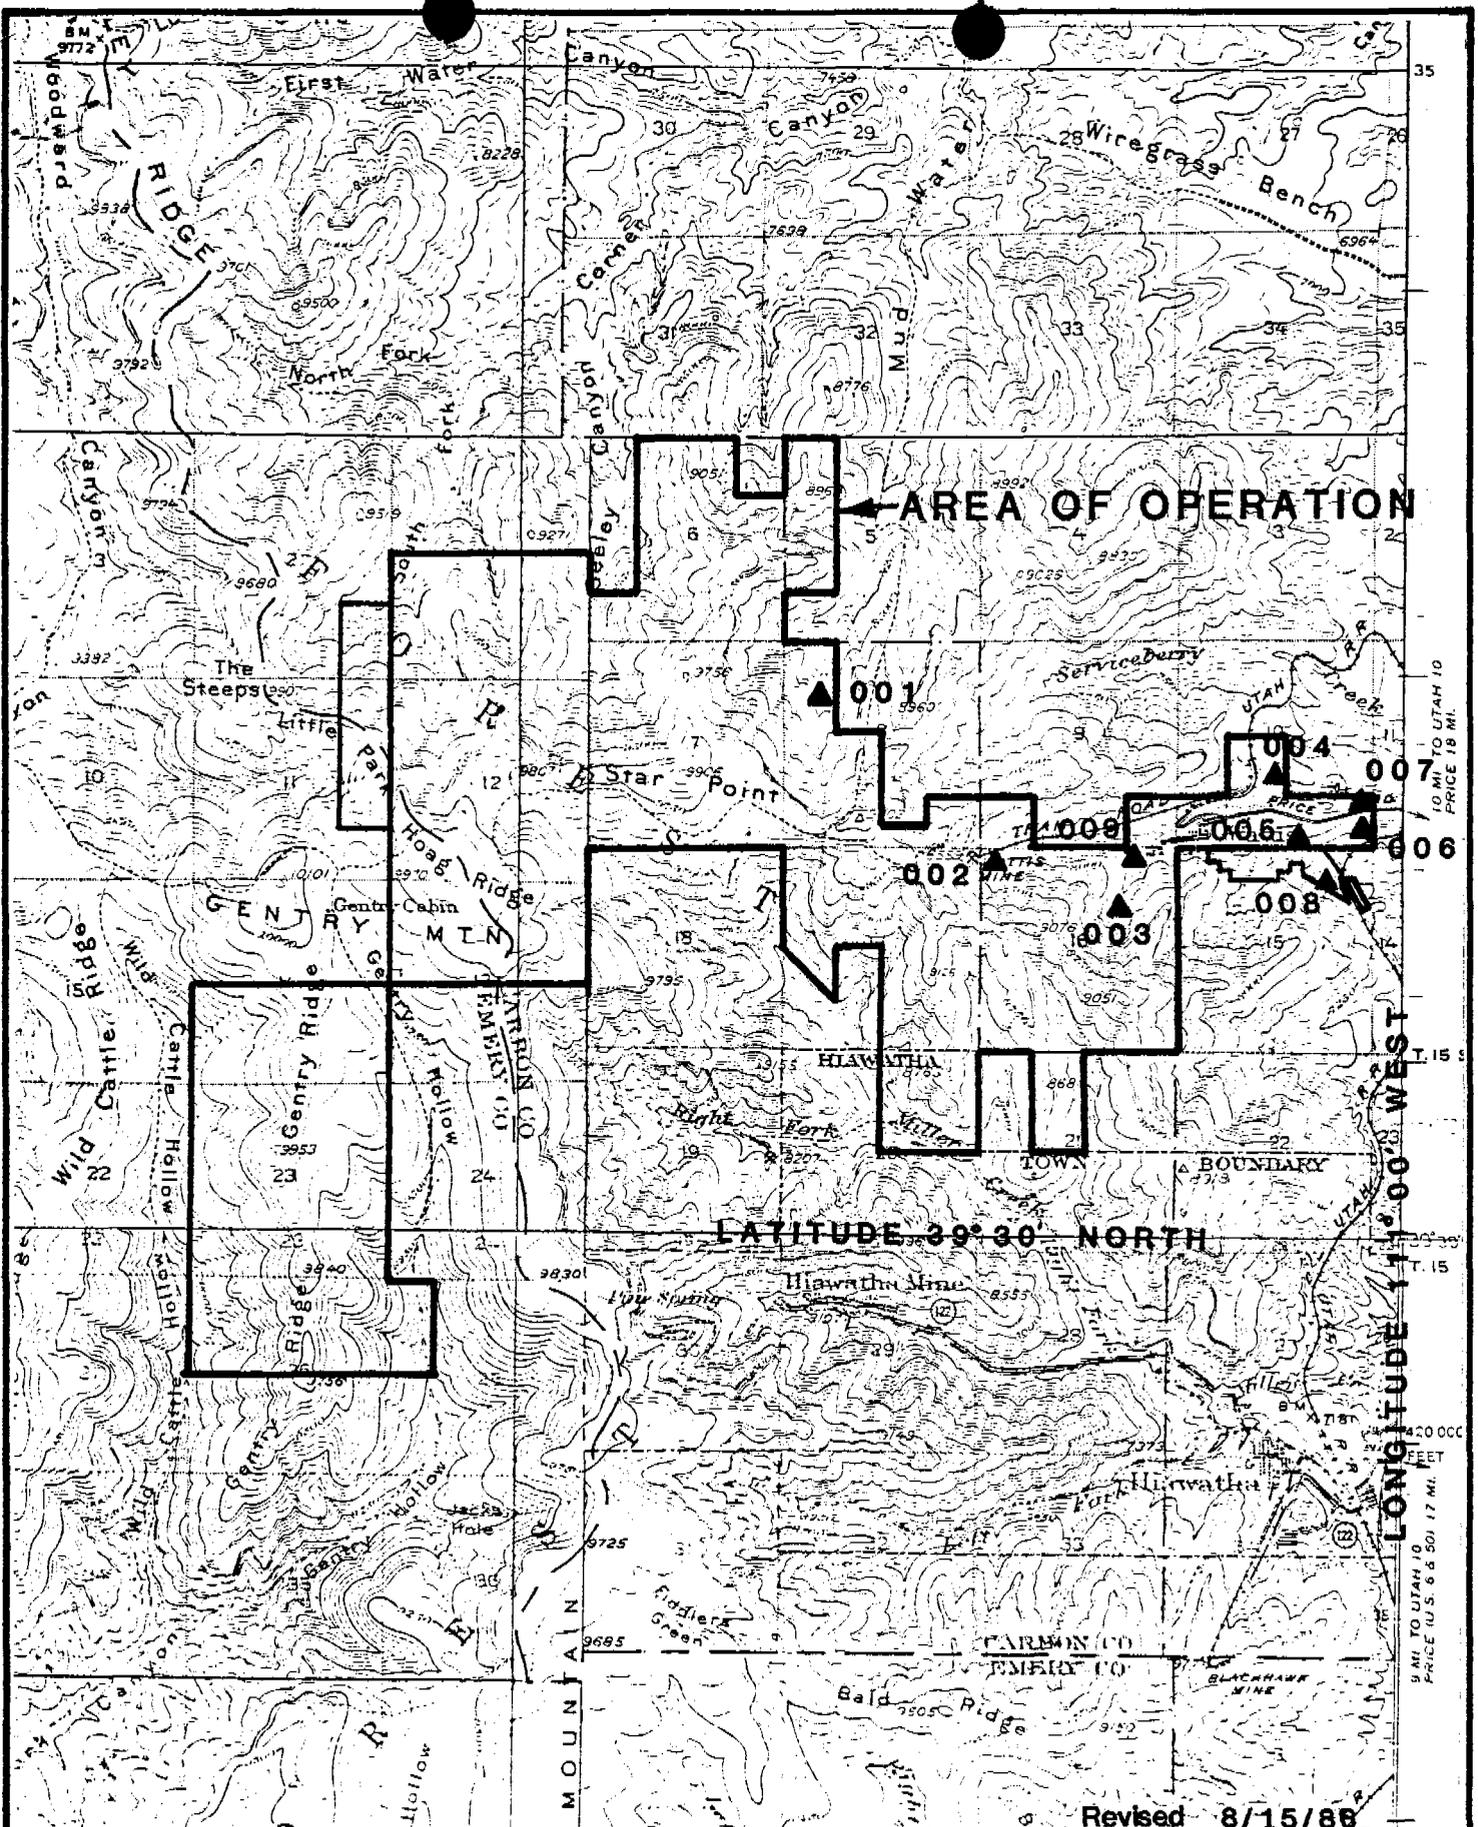

Ben Grimes  
Sr. Environmental Engineer
