Re: Tony M Impoundment

Dear Mr. McNeal:

Plateau Resources Limited's Tony M Mine in Garfield County has been in a stand-by mode for the past two years. No water has been pumped out of the mine into the Dewatering Pond for nearly a year. As a result of the present status of the mine, our staff has been greatly reduced, while most of our obligations remain the same.

We are continuing to collect technical data on a monthly basis and, of course, are still performing the semiannual surveys of the dam. We would like to change the frequency of the visual inspections and the fence perimeter checks from the present weekly requirements to monthly. The gate is locked at all times and the necessary signs are in place. The integrity of the fence has remained unchanged since it was constructed, and the semiannual surveys of the dam show no movement or settling. We feel that the revised schedule will be sufficient to monitor the area.

As of September 1, 1986, unless we receive other instructions from your office, we will perform the inspections as outlined above. If you have any questions, please call me at (801) 788-2120.

Sincerely,

Susan Pentico
