Re: Minor Modification - Drainage Revision

Dear Mr. ^{Lowell} ~~Braxton~~:

Construction of the Unit Train facilities has made it necessary to revise the drainage pattern in the tipple yard area. Enclosed you will find seven (7) copies of plans detailing the new ditches, culverts, and other drainage structures required for this revision.

All new facilities are in existing disturbed areas; no new disturbance will be required. Culverts A7 and B5 will greatly reduce contributions of sediment to Sediment Pond No. 4, thus reducing the need to clean the pond as often.

These new facilities will be incorporated into the permit rewrite scheduled for September; no attempt has been made at this time to incorporate it into our existing permit documents.

Please review the new facilities and let me know of any concerns.

Respectfully,

Ben Grimes
Environmental Coordinator
