RE: Field Orientation, MRP Amendment, Incidental Revisions to Surface Facilities, November 25, 1985 Submittal, Plateau Mining Compay, Star Point Mines, ACT/007/006, #3, Carbon County, Utah

On December 17, 1985, Division personnel Dave Wham and Dave Hooper met onsite with Ben Grimes of Plateau Mining Company (PMC) to view the area proposed for the relocation of a section of Diversion Ditch #7E.

The Division's main concern with this proposal is that proper riprap material be placed along critical sections of the diversion ditch. As was stated in PMC's November 25, 1985 submittal and reaffirmed by Mr. Grimes at this meeting, PMC is currently expecting a report from Vaughn Hansen Associates evaluating the ditch for riprap requirements. The Division requested that the report include a horizontal profile of the proposed channel and advised Mr. Grimes that this information must be submitted before the review process can proceed.
