RE: Review of Second Submittal on Plateau Mining Company's
Proposed Graben Crossing Revision, ACT/007/006, #3,
Carbon County, Utah

Attached is a submittal from Plateau Mining Company responding to the Division's December 12, 1984 deficiency letter. As none of us were involved in the initial review, this memo is to provide guidance on the review of Plateau's current submittal.

Our goal in this review is to assess if Plateau has adequately responded to the deficiencies contained in the Division's December 13, 1984 letter (copy attached to new submittal). If a major oversight in the 1984 review is apparent, please bring that to my attention.

The final product of this review will be in one of two forms either a technical deficiency comment or a Draft Technical Analysis (TA) write up for each regulation. If technical deficiency comments are generated, I will hold on to all the draft TA language and incorporate into the Draft TA when all technical deficiency comments are adequately addressed.

The following is the regulation assignments for the review.

UMC 783.15 Ground Water Information - RVS
UMC 817.41 Hydrologic Balance - RVS
UMC 817.50 Underground Mine Discharges - TM
UMC 817.54 (783.17) Water Rights - TM

UMC 817.71-.74 Waste Disposal Engineering
Aspects - PGL; Acid- or Toxic-forming aspects -
JSL (see December 24, 1984 letter to Ben Grimes)

Please have your write ups to me by Friday, February
28, 1986. Thanks for your cooperation on this.
