RE: **Sediment Pond 9 - DOGM Letter Dated October 22, 1987  
and DOGM Letter Dated August 20, 1987**

Dear Mr. Hedberg:

In response to your letter dated October 22, 1987 and the memo attached to same we offer the following:

1. Discharges from the new Pond 9 will be monitored according to our NPDES Discharge Permit. The pond is being added to our existing NPDES Permit No. UT-0023736.
2. All pertinent information has been incorporated into the PAP. The responses to permit renewal stipulations, which are being submitted this week contain this information.
3. A 5 percent embankment height settlement factor will be added during construction.

Concerning your letter dated August 20, 1987, I apologize for the mix up and not discussing the situation with you. Having Sediment Pond 9 changes the drainage patterns in the Refuse Disposal Area. The previous submittal modifying the ditches in the area now is obsolete. The new drainage pattern with all appropriate information is included in the responses to permit renewal stipulations discussed previously.

If you have any questions please contact me.

Respectfully,

Ben Grimes  
Sr. Environmental Engineer
