Re: Stipulation UMC 817.121-1-(RVS)

**DIVISION OF OIL
GAS & MINING**

Dear Mr. Braxton:

Enclosed please find fourteen (14) copies of Map 61, Subsidence Monitoring Plan-Map A, which has been revised to address Stipulation UMC 817.121-1-(RVS).

As you can see on the map, the photographic monitoring points in the stream channel have been replaced by subsidence monitoring points. These monitoring points will be surveyed once each year to determine movement. Since these new points will be monitored the same as existing points over our current longwall, no text change is needed in the permit package.

We took a close look at the area, both on aerial photographs and on the ground, to see if aerial photograph targets could be placed near the stream. There were a couple of areas that are potential sites but, due to trees and the extremely steep sideslopes of the canyon, it is very doubtful that any target could be seen on a stereo pair of photographs. This situation precludes monitoring by photogrammetry.

Respectfully,

Ben Grimes
Sr. Environmental Engineer
