RE: Stipulation 817.121-1-(RVS), Five-Year Renewal/New Lands Permit, Star Point Mines, Plateau Mining Company, ACT/007/006, Folder #2, Carbon County, Utah

The Subsidence Monitoring Plan, Map A, and commitment to survey stations once yearly satisfy Stipulation 817.121-1-(RVS). However, the operator must establish baseline ground control data before undermining NFRF Miller Creek. The Division should strongly recommend to the operator that the baseline survey be completed this fall if undermining will be initiated during the ensuing winter months when accessibility is limited.
