RE: Road Stipulations (UMC 817.150-.176), Plateau Mining Company, Star Point Mine, ACT/007/006, Folder #2, Carbon County, Utah

I reviewed the road stipulation submitted by Plateau Mining Company on July 2, 1987. The submittal included specifications for each road width, gradient and road surface. Typical roadway reclamation had already been included in the text on page 784-26 and on Map 49. Plans and profiles were also submitted for roads "A" through "K" and identified on Map 44 and Maps 74 through 77. These submittals are adequate.

I compared the present submittal with the bond calculations in Exhibit 36 and Table 69. It was difficult to compare roads that were numbered versus roads that were lettered. On August 17, 1987, I expressed my frustration to Ben Grimes in a personal conversation. He stated that he would redo Exhibit 36 and Table 69 so that they would be comparable to Table 40 road designations. At that time, I will be able to make a final determination of the bond determination for stipulation adequacy.
