August 17, 1988

TO: John Whithead, Permit Supervisor
FROM: Tom Munson, Reclamation Hydrologist *TM*
RE: Review of April 28, 1988 Submittal, Cyprus-Plateau Mining Company, Starpoint Mine, ACT/007/006, Folder #2, Emery County, Utah

Synopsis

The operator has submitted responses to Stipulation UMC 817.45-.47(3). This memo addresses the adequacy of this response.

Analysis

The Division has reviewed Plateau's response to providing designs for the sediment traps and silt fences. The Division finds Plateau's request for reconsideration to be acceptable. The Division only requires that the operator maintain all alternative sediment controls in a diligent manner following major storm events.

In regards to plans, the Division still needs the operator to submit a general silt fence design, showing installation details and materials used in construction for insertion into the Plan.

Recommendation

Stipulation UMC 817.45-.47(3) will be approved when the operator submits a general silt fence design, showing installation details and materials used in construction for insertion into the PAP.
