Dear Ms. Littig,

Re: Minor Modification - Change Diesel Fuel Storage

We are planning to replace our current underground diesel fuel tanks with above ground tanks. We need to modify the permit to reflect this plan.

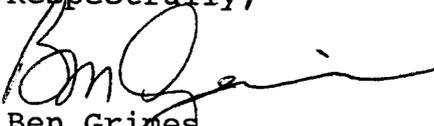

Enclosed are 11 copies of Table 67 with the date changed on item No. 36 to 1991. The existing underground tanks will be removed and disposed of. The new tanks will be placed in a concrete containment structure as shown on the enclosed plan.

Since we are just trading the underground tanks for aboveground tanks, there is no need to modify the reclamation plan or bond. The cost of removing the above ground tanks is less than removing the underground tanks; the hassle of reducing the bond is not worth the effort.

Eleven copies of Map No. 44, Sheet F-12, Surface Facilities, with the new above ground tank structure shown, and the underground tanks removed is being shipped under separate cover from Hansen Allen and Luce.

We would like to make the change in July if possible.

Respectfully,

 Ben Grimes
 Sr. Environmental Engineer
