ACT/007/006
DIVISION ORDER #DO-91A

ORDER & FINDINGS
of
PERMIT DEFICIENCY

PURSUANT to R614-303-212, the DIVISION ORDERS the PERMITTEE, Cyprus-Plateau Mining Company, to make the permit changes enumerated in the findings of permit deficiency in order to be in compliance with the State Coal Program. These findings of permit deficiency are to be remedied in accordance with R614-303-220.

Findings of Permit Deficiency

According to the requirements of R614-301-746.212, the permittee is required to control surface drainage from areas above the refuse pile and runoff from the surface of pile. This runoff will be diverted into stabilized Division channels designed to meet the requirements of R614-301-742.300 to safely pass the runoff from a 100-year, 6-hour precipitation event.

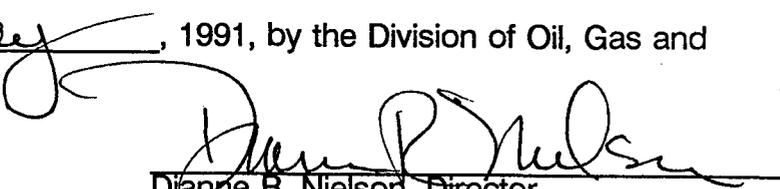

Currently, the permittee does not have drainage controls in place to control surface runoff off the face of the pile or from the top of the pile into stabilized diversion channels.

The permittee will submit the necessary plans and designs for drainage controls to treat drainage from the top and sides of the refuse and upon Division approval, implement these designs.

Cyprus-Plateau Mining Company is ordered to make the requisite permit changes in accordance with R614-303.220, and to submit a complete application for permit change to address the findings of permit deficiency within 30 days of receipt of

this order. Approval by the Division must be obtained within 60 days of receipt of this order. All approvals not obtained within 60 days may result in a hindrance violation unless a request for extension has been obtained by the Director.

Ordered this 6th day of May, 1991, by the Division of Oil, Gas and Mining.

Dianne R. Nielson, Director
Division of Oil, Gas and Mining
