Salt Lake City, Utah 84180-1203

Dear Ms. Littig,

Re: Permit Change - Weather Station

Please find enclosed three copies of revised Map 521.121c, Surface Facilities and revised Table 526.111a showing the revision of item 22. The previous item 22 was a Watchman's Trailer, the trailer and foundation have been removed. The new item 22 is a weather station consisting of a 30 ft. aluminum tower with weather instruments attached and a rain gage located on a pad next to the tower.

The entire weather station consists of approximately 20 Cubic feet of metal and concrete. The Watchman's Trailer consisted of 3,840 cubic feet of material therefore, we ask that the reclamation bond not be revised for this change. A revised copy of Exhibit 542.800a, Reclamation Cost Calculation By Area with the appropriate change will be forwarded in the next few days.

Respectfully,

A handwritten signature in black ink, appearing to read 'Ben Grimes', written over a dotted line.

Ben Grimes
Sr. Environmental Engineer
