RECEIVED

JUL 20 1992

DIVISION OF
OIL GAS & MINING

Dear Mr. Munson,

Re: NOV N92-26-2-1 - 100-year/6-hour design

I received a modification to the referenced violation limiting the violation to only the area at the southwest corner of the refuse pile. The design information for the new ditch was sent to you directly by Hansen, Allen and Luce dated July 8, 1992 using the 100-year/6-hour storm. Eight copies of Map 731.720b are being sent to you by Hansen, Allen and Luce with the correct ditch design details on the tables. There should be no need for any other permit text changes to incorporate the new ditch 81 into the permit.

Ditch 81 will be constructed on the slope of the existing pile and will be extended upward as the refuse pile grows in elevation. The final configuration of the ditch will be as shown on Map 731.720b.

As we discussed in the meeting on the refuse pile on July 14, the refuse pile is being reevaluated with the intent to look at the reclaimability, drainage, slope angle, topsoil requirements and vegetation.

Respectfully,

A handwritten signature in black ink, appearing to read 'Ben Grimes'.

Ben Grimes
Sr. Environmental Engineer
