Cyprus Plateau Mining Corporation
Quarterly Refuse Pile Certification
Quarter

I hereby certify that I am a registered professional engineer in the State of Utah. I certify that I have made an inspection of the coal processing refuse pile at Cyprus Plateau Mining Corporations' Star Point Mine in Carbon County Utah. The refuse pile has been constructed and maintained as designed with the following exceptions: 1) the west piezometer was destroyed during the quarter - a drilling contractor will construct a new piezometer during the first week of October; and 2) the east piezometer was plugged - it will be unplugged or a new piezometer will be constructed during the first week of October. The two remaining piezometers were dry on 9/29/93. The 1992 certification performed by Rollins, Brown and Gunnell dated December 31, 1992 also certifies the pile to be in conformance with the requirements of design criteria. There are no apparent areas of instability, structural weakness or other hazardous conditions.

W. John Borla
