INSPECTION REPORT COMMENTS

Permit No. ACT 007/006

Inspection Date 12/23/93

Please number comments to correspond with topics on previous page.

General Comments Discussed with John Borla what changes he anticipates with the acquisition of Amax by the parent company. He explained that the parent company is Cyprus-Amax with Cyprus as one separate entity and Amax a separate entity. Therefore the permits will be as current i.e. two separate DOGM permits. Some personnel may be working at Castlegate and Starpoint with whom the Division maybe involved with. However, such details have not been worked out.

Division The road ditch on the main road going to the upper office, adjacent to the coal pile had some coal in the ditch that must be cleaned before it becomes a compliance problem. This matter was called to Mr. Mosseman's attention.

Previous followup work on dimensions B2 A & B was again reviewed. In order for the two dimensions to flow in other dimensions the operator had to construct the ditch to exceed the design depths.

Sediment Ponds Ponds 2, 3, 4, 5, 6, 7, 8 & 9 were observed and evaluated.

Coal Mine Refuse Observed the active refuse pile. The operator is still operating under the interim plan until such time the the pile reaches a uniform level. No standing runoff was observed on the top of the refuse pile.

Non Coal Waste Non coal waste was stored in the concrete bunkers and dumpsters.

Road Road to the mine site was maintained and void of snow. Other primary roads were observed and some had a small amount of snow cover, but were suitable for vehicle travel.
