DIVISION OF
 OIL, GAS & MINING

Dear Mr. Sauer,

RE: TOXIC FORMING/ACID FORMING POTENTIAL - ROOF AND FLOOR ROCK
 SAMPLES

*Copy from
 AC7/007/006 #2*

Enclosed are eight copies of the revised text to be inserted into Volume VIII of our MRP. After your telephone call last Friday, I looked up my July 8, 1992 letter and found that the text in the MRP had already been made in anticipation of Division approval. These eight copies can be inserted directly into the MRP sets.

Map 116.100c where the sampling locations are shown has been revised at least 3 times, with the required number of copies sent to the Division each time. Since the sampling locations proposed in my July 8, 1992 letter are shown on the revised map, and since the Division has, I assume, distributed revised copies of this map to the appropriate agencies with copies of our MRP, I don't think we need to provide additional copies of the map. For your benefit, I am including one copy of the map for your review; please compare this copy with the copy in our MRP set at the Division office. If the sampling locations match, there should be no need for additional copies. If you need additional copies of the map, please let me know.

Respectfully,

A handwritten signature in black ink, appearing to read 'Ben Grimes'.

Ben Grimes
