Slide Reclamation Plan

Have reviewed the October 4, 1994 plan on the Class I haul road slide. The permittee has completed a detailed review of the current approved reclamation plan and has taken the following approach.

- (1) Utilize the current approved final Mining and Reclamation Plan on work categories pre-topsoiling, seedbed preparation, seeding;
- (2) Utilize the current approved final Mining and Reclamation Plan on work categories topsoiling and post-seeding with additional comments covered in the plan;
- (3) The slide plan covers stability and road maintenance/reconstruction, and;
- (4) The submission includes individual page changes to the MRP on this site specific reclamation plan. This was done in order to have a record what was approved relating to final reclamation on the slide. This road will be retained as a county road.

In summary, the reclamation work is summarized on the attached page.

Recommend the additions and site specific items discussed in the permittees submission that I have reviewed be approved.

LION DECK CLASS I ROAD SLIDE RECLAMATION PLAN SUMMARY

I	In the Current Approved MRP	Additional	Cover In Site Specific Slide Plan Provided by Permittee
STABILITY	Not Site Specific	Yes	Yes - Separate report prepared by Earthfax Eng. Meets stability requirements.
PRE-TOPSOIL	Yes		
TOPSOILING	Yes
