General Comments Conducted a partial inspection of the Starpoint chine. Most of the time the inspection was spent on the refuse pile, dimensions, drop drains, culverts and other control measures that were located in the immediate area of the four previous areas of attention Followup Items. The operator performed routine maintenance on the three items outlined in the 5/30/96 inspection report.

Compliance A notice of violation was issued on the refuse pile. The alleged violation was issued because of refuse placement, drainage control and the fact that the last two lifts the outslope on some areas of the refuse pile exceeded 2:1 slope. Had a meeting with the Surface Foreman, his supervisor (Charge of Technical Service) and the Environmental Coordinator what recently took place as related to the refuse pile problem was discussed and the highlights are documented in the inspectors statement. The permittee immediately took

positive steps to initiate corrective action
Dispersions Some dispersions, drop drains, and
culverts require minor maintenance. These will
be checked at the next inspection since additional
runoff may result in the aforementioned control
measures not meeting performance standards.
Other Sediment Control Some minor maintenance was
suggested on several silt fences.
