**UDOGM HIGHWALL SURVEY
STAR POINT MINE
ACT/007/006**

1. Identify each highwall in connection with the mine and provide a description of its location and extent.
 - A. See Maps 542.200a, b and c
 - B. See Attached 1976 Flyover photos
 - C. Additional information is being assembled, such as comparing flyover photos with topographic maps generated from them, i.e., Sheet Nos. 5 and 8. Also, compare mine workings (attached) with topos.

2. Provide verification of highwall and adjacent cutslope creation dates.
 - A. See enclosed Maps and Photos. This activity is still in the information data gathering phase so that the date of the cuts, separate from the highwall cuts, made to facilitate the bathhouse and parking facilities can be better pinned down.

3. Provide a reference to the Mining and Reclamation Plan (MRP) which discusses the final reclamation and elimination or retention of the identified highwalls.
 - A. See page 500-73, section 542.200-542-742.
