From: Wm. J. Malencik, Reclamation Specialist

 RE: River Gas Proposal, Cyprus Plateau Mining Corporation, Star Point Mine, ACT/007/006.#2
Folder #2, Carbon County, Utah

Copy PAM

Here are the highlights of our meeting:

Date of Meeting: June 29, 1999Place of Meeting: Star Point Mine and contiguous areas

Who Attended: Johnny Pappas, Cyprus Plateau Mining, 472-4712
 Mark Page, State Engineer, 637-1303
 Don Hamilton, River Gas, 637-8876
 Larry Jensen, Nelco, Inc., Contractor, 637-3495
 Rich White, EarthFax Engineering, 801-561-1861
 Bill Malencik, DOGM, 613-5330

Goal of Meeting:

- (1) To discuss an existing ancillary road that provides access to sediment pond #4, and moreover, is a road that provides unrestricted access areas beyond the mine. It's a loop road and terminates on a county road in a north easterly direction adjacent to Price, Utah. The total length of the road is about 12 miles, starts and ends at a county road and the permitted portion is about 200'.
- (2) To discuss what changes are needed to the existing MRP to accommodate the River Gas proposal.

River Gas Proposal

ACT/007/006

July 6, 1999

Page 2

- (3) To reach an understanding on what needs to be done, who will pay for it, and who will do what.
- a) River Gas will:
- pay all costs associated with this amendment.
 - employ contractors to survey, design the changes as discussed, and prepare a permit amendment for Cyprus to update the operation and reclamation portions of the MRP.
 - a Mining and Reclamation Plan permit amendment will be approved and submitted by Mr. Pappas.
- b) River Gas will commence work when the amendment is approved and River Gas is notified by Star Point to start the project.
- c) A stream alteration plan will be submitted to State Engineer and to the Division anent diversion 9B (see sketch).

Special note to Attendees:

There is no pride in the authorship of the above. It represents my understandings. If your understanding is different let Johnny Pappas and Don Hamilton and other attendees know about your suggested changes.

I reduced this matter to writing for a two-fold purpose (1) to finalize our understanding, and (2) to alert DOGM officials because of the tight time frames as discussed by River Gas officials.

TABLE HIGHLIGHTING SIGNIFICANT CHANGES

MRP - CURRENT AND PROPOSED CHANGES

	CURRENT	PROPOSED	COMMENT
ITEM #1	Road A - Ancillary	Delete as a MRP road except for A ¹	Road A will be maintained by River Gas. Road A will be deleted from MRP. Road A will be designed and relocated.
ITEM #2	Road A/Diversion 9B - Concrete Ford	Remove concrete ford and replace with culvert.	Will be relocated on a designed realigned road.
ITEM #3	Diversion #24	1) Reclaim lower segment. 2) Install culvert on road A ¹ and divert into diversion 9B.	Culvert will be designed per existing ditch design.
ITEM #4	Silt Trap #18 & #19	Delete	Road design will provide sediment control as a component of the road ditch.
ITEM #5		All areas where above items will be modified and/or realigned, River Gas will reclaim the areas as specified in the amendment. RIVER GAS AS IT CONCERNS A STAR POINT this project. b) will employ EarthFax to design, prepare, and finalize the permit amendment. c) will submit the amendment to Star Point.	areas within the permit that
ITEM #8		Diversion alteration will be designed by EarthFax and submitted for approval of both the State Engineer and DOGM.
