Re: Kaiser Steel Corp.
Sunnyside Mine
Carbon County, Utah
ACT/007/007

Dear Mr. Grosely:

It has been brought to our attention by the Office of Surface Mining that Exhibit I, regarding pre-existing, non-conforming structures and facilities, that you submitted on July 3, 1978 does not have any supporting documentation identifying those structures. There was some minor confusion as a result of the exhibit and cover letter citing Section 715.11 (c) which applies to surface mines, instead of Section 710.11 (d) which addresses plans for pre-existing, non-conforming structures. In their correspondence O.S.M. also mentioned that they did not have any plans for the reconstruction of these structures as required under Section 710.11 (d) (2) (ii).

I have informed O.S.M. that Mr. Tom Paluso did, in fact, describe such structures in sworn testimony on May 3, 1978 during a public hearing before the Division regarding the matter of granting an extension to the deadline as set forth in Section 710.11 (d) (2) of the regulations and I have referred them to the transcript of the proceedings.

During the aforementioned hearing, Kaiser Steel was granted a ten-week extension for submitting reconstruction plans to the Division of pre-existing, non-conforming structures at the Sunnyside Mine complex. This extension period expired on July 12, 1978. To remain in compliance with the pertinent regulations please submit your plans, in duplicate, to the Division for review and submission to O.S.M. for approval as soon as possible. A written narrative describing your pre-existing, non-conforming structures and facilities might also be helpful.

Mr. Barry Grosely
