Re: Sunnyside Mines
ACT/007/007
MC-717.17 Violations

Gentlemen:

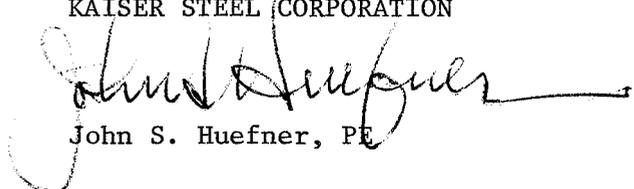

Submitted herewith are the plans and calculations of the design of the proposed 50' wide x 80' long x 5' deep sedimentation ponds that Kaiser Steel Corporation will install at the following two locations:

1. At base of coarse refuse pile.
2. In Icelander gully.

If approved, we tentatively plan to construct these two ponds during October & November 1979, prior to the onset of the winter season.

Sincerely,

KAISER STEEL CORPORATION
