RE: Kaiser Steel
Sunnyside Mines
Refuse disposal road berm
ACT/007/007

Dear John:

The Division staff has reviewed Kaiser's request to place additional coal waste material on approximately one-half mile of existing berm alongside the haul road leading to the coarse refuse pile. It is felt that approval of this proposal can be issued with the following stipulations:

1. Prior to increasing the berm, temporary sediment control structures shall be installed to prevent runoff and erosion from the road and downslope.
2. Temporary sediment control structures shall be replaced by permanent facilities which have been approved by the Division. Plans and specifications for such facilities must be submitted to the Division within 30 days of receipt of this letter.
3. The berm shall be constructed with only the minimum amount of material necessary to meet MSHA requirements.

No. 538607

4. The berm will be subject to continuous monitoring during the study period and may be removed if the results of the study require such action.

If there are any further questions, please contact the Division.

Sincerely,

RONALD W. DANIELS
