CONFIRMATION/REPORT OF TELEPHONE CONVERSATION

T O	Name	Eileen Doherty	F R O M	Name	John Huefner	DIVISION OF OIL, GAS & MINING
	Office	OSM		Office	Kaiser Steel- Sunnyside Mine	
	Location	Denver, Colo.		Location	Sunnyside, Utah	
	Telephone Number	303-837-5701		Telephone Number	801-888-4421	

Purpose of Call:

Mr. Huefner called this morning to inform me of existing conditions at the Sunnyside minesite in reference to abatement activities required by NOV #80-5-7-26, 1 of 2, and 2 of 2. The weather has been cold recently, and Mr. Huefner informed me that the grader was not able to effectively grade the access road under citation. Disturbed areas have been seeded, which includes disturbed areas along this access road. Temporary measures of placing straw bale dikes in the affected drainage channel will be taken immediately. Issuance date was 29 October 1980, and abatement dates for both violations is 15 December 1980.

Explanatory Remarks:

I informed Mr. Huefner that I could only extend the abatement date to the end of January 1981, which would not help the situation. I directed him to place the straw dikes immediately, and that a representative of either the State or of OSM would be to the minesite sometime in December to evaluate the feasibility of working the road surface.

Responsibility still remains with the operator to control surface runoff from the road using temporary measures; sidcasting from the access road is still prohibited in any form due to the proximity to the drainage channel; and dressing of the wide turnout area on the south side of the road will still be necessary when conditions are deemed favorable.
