Re: Sunnyside Mines
ACT 007/007
Refuse Use - MC 717.17(4)

Gentlemen:

Kaiser Steel Corporation hereby requests a 60 day extension of the special refuse use study.

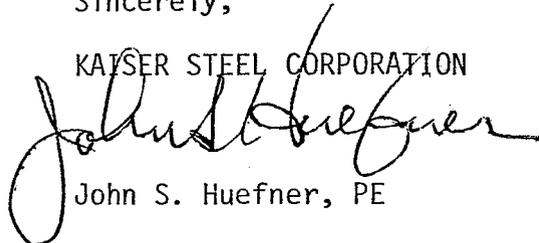

Additional time is needed to allow us to properly assemble the results from the creek bottom analysis conducted by Dr. R. Winget, together with all pertinent supporting data, and give the Division sufficient review time prior to submitting the final results to the Board.

The final quarterly report from Dr. Winget will be received in late October which does not leave sufficient time for review and writing the final report. The extension is requested to provide time for DOGM input and recommendations to be included in the report.

We thank you for your favorable consideration.

Sincerely,

KAISER STEEL CORPORATION

John S. Huefner, PE
